Introduction to the Child Center

What is the Child Center ?

The Child Center is a safe haven dedicated to protecting and healing abused children and supporting their families. It acts as a single point of contact, bringing together relevant service providers to ensure that abused children and their families receive comprehensive care. This includes assessment, treatment, and support services, all designed to promote child wellbeing and strengthen family bonds

Children who have experienced various types of abuse are supported at the Center including sexual abuse, physical abuse, emotional abuse, and neglect

As a recognized Center of Excellence within the Abu Dhabi Child Protection system, the Child Center is dedicated to enhancing our expertise, conducting research, and raising community awareness to better support the children and families we serve

All services are provided free of charge

Principles of the Child Center

- Comprehensive approach
- Collaboration between entities
- Emphasis on child-centricity and family cohesion
- Excellence

What are the benefits of the Child Center?

Reducing Trauma: We prevent the need for children to repeat their stories to multiple agencies in different locations, which could cause them to relive their trauma

Accelerating Response: We expedite and enhance the provision of services to address the needs of abused children and their families swiftly and effectively

Enhancing Cooperation: We facilitate effective collaboration among various entities to provide holistic care
